

**DESIGNED
and BUILT
by a fourth-generation
FARMER**

Fits grain bins
24'-42'
48'-60'
IN DIAMETER

Ability to handle
up to
8,000
BUSHELS
PER HOUR

- Unique design allows for access from the top of the bin.
- Distributes fines and bees wings evenly throughout the bin.
- At this time, the Cornado Grain Spreader is only approved for shelled corn and soybeans.

WATCH the Cornado in Action

**KEY
ADVANTAGES**

V-SHAPED CHUTE ensures that the grain remains centered as it flows down

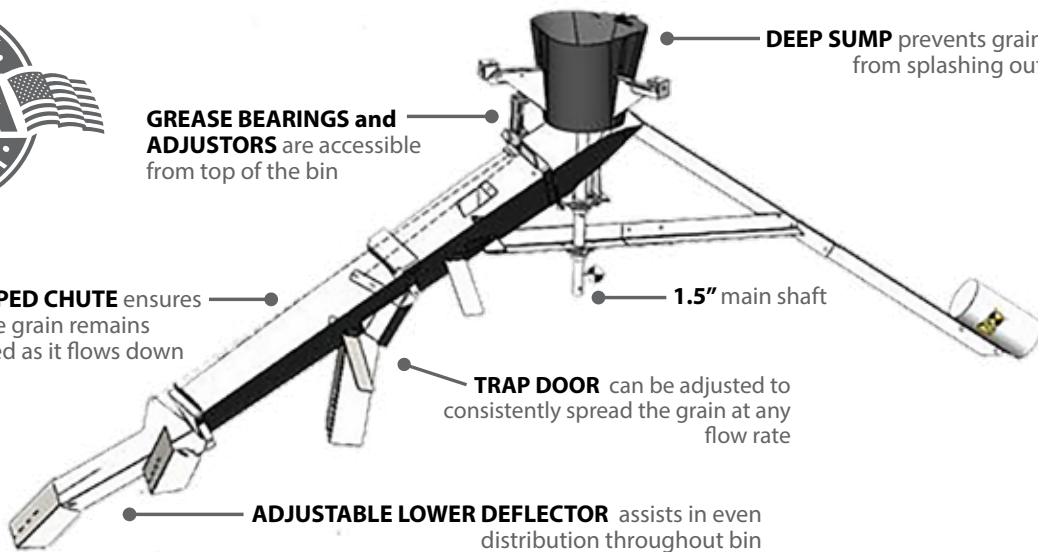

GREASE BEARINGS and ADJUSTORS are accessible from top of the bin

DEEP SUMP prevents grain from splashing out

1.5" main shaft

TRAP DOOR can be adjusted to consistently spread the grain at any flow rate

ADJUSTABLE LOWER DEFLECTOR assists in even distribution throughout bin
